Little DaVinci Appearing on Season 2 of Emmy-Nominated Tomorrow's World Today

Pittsburgh, PA: If you've ever struggled to convince a child that broccoli is a necessary part of life or had a toddler that refused to eat anything but frozen waffles for what seemed like an eternity, then you know that it can be a challenge for kids to get all of the vitamins and minerals that help them grow. Little DaVinci has applied the highest quality standards that have historically been reserved for premium adult supplements. Little DaVinci supplements are formulated without sugar, allergens, dairy, gluten, and other unwanted fillers and binders. Each product is rigorously tested for compliance as the line is made up of chewables, powders and liquids with activated ingredients that taste good.

This season, *Tomorrow's World Today* will speak with Dr. Matt Hand, DO and Dr. Adam Kilpatrick, DC CNS, who are advocates for integrative health care for children. Little DaVinci is a collaboration between DaVinci Laboratories of Vermont and Dr. Hand, one of the most highly regarded pediatric nephrologists in the industry. Dr. Hand specializes in Pediatric Integrative Medicine at Elliot Health System and Children's Hospital at Dartmouth (CHAD).

"Our goal is to start a movement around children's health realizing it starts with us and we can make a difference. Providing pediatricians and parents with natural, therapeutic options that are based on clinical data," Sharon Rossi, CEO of FoodScience Corporation. "These formulas are delivered in a format kids will love, and are cost effective for Mom and Dad."

Tomorrow's World Today, nominated for a 2019 Daytime Emmy, returns to Science Channel for season two this month. Viewers can tune in every Saturday and Sunday morning at 8am throughout May to watch brand new, back-to-back new episodes.

About *Tomorrow's World Today*
www.tomorrowsworldtoday.com

This cutting-edge television show travels the world in search of innovative pioneers who are creating new ways to utilize our natural and technological resources for a more sustainable lifestyle. *Tomorrow's World Today* has a homebase in Pittsburgh, PA, one of the nation's most progressive tech landscapes, home to Duolingo, the most downloaded educational app in the world, and UBER's flagship location for autonomous transportation.
