PHYTO BENEFITS™

Phyto Benefits™ is a dietary supplement designed to support oxidative balance and overall health.*

This unique formula, part of DaVinci's® Benefits Line, provides evidence-based extracts from the most powerful botanicals in natural medicine.* This compilation formulation covers the concerns associated with supporting healthy levels of oxidative stress, detoxification capabilities, metabolic processes and immune health.*

In a health regimen for your patients, **Phyto Benefits™** can easily be used as an oxidative stress botanical multi option. It also can be used as a companion product to a standard multivitamin or to any aging protocol, such as one that includes Telomere Benefits™.

Oxidative stress can have far-reaching bodily effects, including on immune system function and metabolic health. Because free radicals are important to our bodies' functions, the goal of **Phyto Benefits™** is not to eliminate them, but to support normal balance between generation and elimination. Detoxification and reactive oxygen species (free radicals) are inextricably linked.

The plant compounds known interchangeably as phytonutrients or phytochemicals serve various functions for plant vitality. Legumes, herbs, spices and nuts are sources of phytonutrients; fruits and vegetables are concentrated sources. When we consume these phytonutrient-rich plants, we offer our bodies natural free radical scavenging support.

Phyto Benefits supports:

- Healthy detoxification processes*
- Overall oxidative balance*
- Normal free radical production and scavenging*
- Metabolic health*
- Immune system function*

Phyto Benefits includes:

Broccophane®, a branded, researched version of broccoli sprout extract, sulforaphane, which Broccoli is one nutrient-rich plant food; a branded, researched version of its sprout extract, whose action involves its ability to support healthy modulation of the CYP enzymes, an important part of oxidative balance.

Green tea, whose major catechin, EGCG, has gained increased notoriety in natural medicine for its particular free radical scavenging activities.* We also know that it supports normal tyrosine phosphorylation, which can in turn support healthy expression of iNOS and thereby normal rates of production of NO, a free radical.*

Meriva® Curcumin Phytosome™, a curcumin formulation designed for up to 30-fold greater bioavailability compared to standard extracts. Curcuminoids merge with free radicals to prevent further oxidation, and support normal inhibition of enzymes that participate in the synthesis of substances like prostaglandins and leukotrienes.*

Lyc-O-Mato® lycopene, which supports the normal induction of phase II metabolizing enzymes.*

Polyognum cuspidatum Root Extract, standardized to 50% trans-resveratrol. Trans-resveratrol works at the genetic level. Its principal mode of action supporting normal inhibition of certain phosphodiesterases (PDEs), enzymes that help regulate cell energy.*

Quercetin, a flavonoid that supports normal histamine response.*

P40™ (a pomegranate fruit extract), whose compounds support normal activation of multiple pathways related to oxidative stress, including the notable NF-kB pathway.

Supplement Facts

Serving Size 1 Capsule

Amount Per Serving

BroccoPhane® Broccoli Sprout Powder (standardized to 400 ppm Sulforaphane)	100 mg
Green Tea (Camellia sinensis L.) Leaf Extract (Standardized to 70% EGCG)	100 mg
Meriva® Curcumin Phytosome™ (Curcuma longa root extract/ Phosphatidylcholine complex)	100 mg
P40p™ Pomegranate (Punica granatum) Fruit Extract (Standardized to 40% Punicosides)	100 mg
Quercetin Dihydrate	100 mg
Lycobeads® natural tomato extract containing [5%] 2.5 mg Natural Lycopene	50 mg
Polygonum cuspidatum Root Extract (Standardized to 50% trans-resveratrol)	50 mg

Other ingredients: hypromellose (capsule), microcrystalline cellulose, vegetarian leucine.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.

Suggested Use: As a dietary supplement, adults take one capsule daily, or as recommended by your healthcare practitioner.

Lycobeads® is a registered trademark of LycoRed Ltd. Meriva® & Phytosome™ are registered trademarks of Indena SpA. BroccoPhane® is a registered trademark of Cyvex Nutrition, Inc.

Sold Exclusively Through Healthcare Practitioners.
