# SKIN & COAT

- **Skin & Coat contains beneficial ingredients, including antioxidant Vitamin E and Essential Fatty Acids, that are recommended to support skin and coat health.**
- **Skin & Coat** is formulated with Omegas 3, 6 and 9 to promote healthy skin and normal shedding. With added salmon oil and vitamin E, **Skin & Coat** helps keep your dog's coat healthy, shiny and full.
- **Skin & Coat** chews are designed to support:
  - » Coat sheen, luster and proper skin tone
  - » Skin comfort for dogs
  - » Normal shedding

### About the formula:

**Skin & Coat** contains ingredients specific to skin and coat health in dogs.

- » Flax seeds are rich in ALA (alpha-linolenic acid), an omega-3 fatty acid that helps support skin comfort. Flax seeds also contain lignans, which may have antioxidant properties, as well as vitamins B1, B2, C, E, and beta-carotene, and minerals like iron, zinc, potassium, magnesium, phosphorus, and calcium.
- » Safflower oil is an excellent source of linoleic acid (omega-6 fatty acid), which supports skin tone and elasticity. Linoleic Acid is an essential fatty acid needed by the skin and supports the texture and luster of the coat. Incorporation of fatty acids into cell membranes supports the structural integrity of the skin and coat.
- » Vitamin E is essential for proper skin health. It is an antioxidant that neutralizes free radicals that could damage skin.
- » Salmon oil supplies omega 3 fatty acids - in particular EPA and DHA - the proper omega-3 fatty acids for skin, coat, and the overall health of your dog.

### Guaranteed Analysis per Chew (2 g):

Levels represent minimum values unless otherwise stated:

Crude Protein	11%
Crude Fat	13%
Crude Fiber (max)	1%
Moisture (max)	12%
Linoleic Acid (3.3%) (an Omega 6 Fatty Acid)	60 mg
Vitamin E	30 IU
*Omega 3 Fatty Acids (1.2%)	23 mg
*Omega 9 Fatty Acids (1.5%)	29 mg

\*Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profiles.
